

BRAND GUIDELINES V3.0

Teal Aurora Design System

The light, luminous visual identity for Strategia. Glassmorphic surfaces on a vivid teal gradient — energetic, modern, and approachable.

LOGO & BRAND MARK

Logo & Brand Mark

Three elements compose the Strategia identity system: the triangle brand mark, the wordmark, and the combined logo. Below are the variants used across the Teal Aurora landing page.

BRAND MARK

The standalone brand mark. Used in the navigation bar where it animates on scroll.

WORDMARK

STRATEGIA

STRATEGIA

The wordmark without the brand mark. Used in the navigation bar alongside the triangle and in the hero brand lockup.

COMBINED LOGO — INLINE

The primary combined logo. The abyss variant is used in the CTA section.
COMBINED LOGO — STACKED

The stacked layout for vertical or compact placements.

GLOW TREATMENT

The glow variant with a soft luminous halo. Used in the footer.

CLEAR SPACE & MINIMUM SIZE

Minimum clear space equals the height of the brand mark (triangle) on all sides.

Minimum reproduction width: 120px for inline, 80px for stacked.

COLORS

Color Palette

A teal-forward palette. The gradient background provides the warmth; glass surfaces and navy text provide contrast and legibility.

PRIMARY

Harbour

 #0B6477

 R11 G100 B119

 --harbour

Deep teal anchor. Page background base, section anchors, and footer tones.

Viridian

 #00897B

 R0 G137 B123

 --viridian

Mid-teal. Accent bars, slider thumbs, and converge dots.

SECONDARY

Teal

 #00C9B7

 R0 G201 B183

 --teal

Bright cyan-teal. Gradient midpoints and background washes.

Mint

 #4AE2B7

 R74 G226 B183

 --mint

Vivid mint. Hero gradient highlights and marquee accents.

Aqua

 #56C8C3

 R86 G200 B195

 --aqua

Soft aqua. Secondary gradient stops and glow tones.

NEUTRAL

White

📄 #FFFFFF

📄 R255 G255 B255

📄 --white

Primary text on teal backgrounds. Also cursor aura and plasma glow base.

Navy

📄 #06293E

📄 R6 G41 B62

📄 --navy

Card text and headings on glassmorphic surfaces. Primary button fill.

SURFACE

Glass

📄 `rgba(255,255,255,0.55)`

📄 White 55%

📄 --glass

The signature glassmorphic surface. Cards, section panels, and stat rows. Always paired with `backdrop-filter: blur(16px)`.

Glass Elevated

📄 `rgba(255,255,255,0.62)`

📄 White 62%

📄 --glass-elevated

Hover state for glass surfaces. Provides subtle lift on interaction.

Glass Subtle

📄 `rgba(255,255,255,0.18)`

📄 White 18%

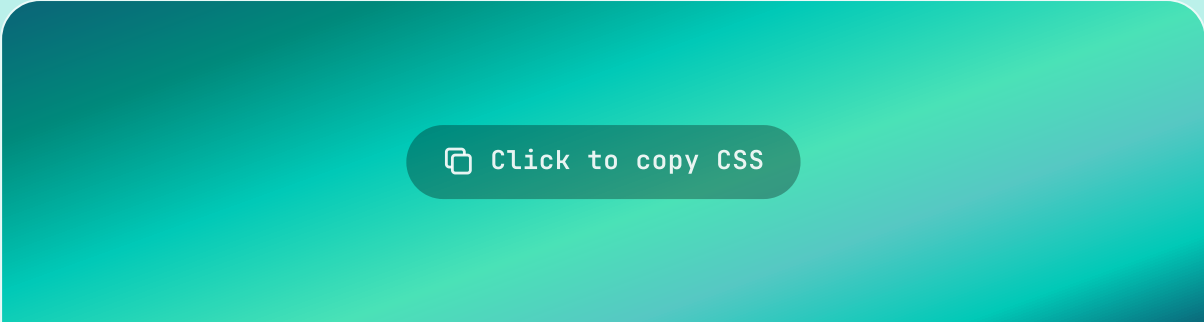

📄 --glass-subtle

Hero copy box background. A lighter glass for overlaying the hero gradient.

GRADIENTS

Signature Gradients

Four gradients define the Teal Aurora language. Click any preview to copy the CSS value.

A large rectangular preview of the Teal Aurora gradient, showing a smooth transition from dark teal at the top to light teal at the bottom.

Click to copy CSS

Teal Aurora Primary Page Gradient

The signature 7-stop page gradient (wraps back to origin). Used as the full-page background and hero backdrop. Creates the luminous, underwater-light atmosphere.

 #0B6477

 #00897B

 #00C9B7

 #4AE2B7

 #56C8C3

A large rectangular preview of the Teal Aurora gradient, showing a smooth transition from dark teal at the top to light teal at the bottom.

Click to copy CSS

Hero Bloom Hero Background

A 5-stop directional gradient for the hero section. Overlaid with soft radial white glows for depth.

 #0B6477

 #00897B

 #00C9B7

 #4AE2B7

 #56C8C3

A large rectangular preview of the Hero Bloom gradient, showing a smooth transition from light teal at the top to dark teal at the bottom.

Click to copy CSS

Marquee Band Marquee / Banner Gradient

Vivid accent gradient for the scrolling marquee strip. Transitions from bright mint to deep teal.

#4AE2B7

#56C8C3

#0B6477

 Click to copy CSS

Accent Bar Interactive Accent

A 3px directional bar that appears on hover. Used on module cards (top edge) and solution cards (left edge) to signal interactivity.

SURFACES & GLASS

Glassmorphic Surfaces

The defining visual feature: frosted-glass panels layered over the teal gradient. Every content surface uses white-alpha backgrounds with backdrop-filter blur.

The Science

How AI-driven signal triangulation predicts candidate success across healthcare roles.

Section Panel

rgba(255,255,255,0.55)

blur(16px)

24px

Main content sections. Provides the frosted-glass enclosure for all content areas.

Resume Intelligence

Extracts 140+ structured signals from unstructured resumes.

Card

rgba(255,255,255,0.55)

blur(16px)

16px

Module cards, stat cards, and badge items. Hover lifts to 0.62 opacity.

Parse Signal

Signal Chip

rgba(255,255,255,0.45)

12px

Small indicator chips inside the triangulate section.

Predict better hires

AI-powered workforce intelligence for healthcare.

Hero Copy

rgba(255,255,255,0.18)

blur(18px)

20px

The headline container overlaying the hero gradient. Uses lighter glass for readability.

\$2.4M

Projected annual savings

ROI Output

`rgba(255,255,255,0.55)`

`blur(16px)`

`20px`

Calculator output display with a soft shadow: 0 8px 32px -8px rgba(0,0,0,0.06).

EFFECTS & MOTION

Visual Effects

Ambient motion and interactive feedback create a living, breathing visual experience. All effects use mix-blend-mode: screen and respect prefers-reduced-motion.

Cursor Aura

A 520px radial white glow (rgba 255,255,255 at 0.40→0) that follows the mouse. Uses mix-blend-mode: screen and filter: blur(10px). Fades on touch/reduced-motion devices.

Plasma Blobs

Floating white radial gradient circles (same gradient as cursor aura) that drift across the page using cubic-bezier easing. Hidden on mobile/reduced-motion.

Pulse Rings

Expanding concentric circles with a ring-shaped radial gradient (transparent center, white band at 62–76%, fade out). Mix-blend-mode: screen.

Scroll Reveal

Elements fade in from 24px below with opacity 0→1, using cubic-bezier(0.16, 1, 0.3, 1) over 0.7s. Triggered by IntersectionObserver.

Nav Appear

Fixed nav starts at opacity 0, becomes visible after hero animation completes. On scroll, gains glass background (rgba 255,255,255,0.55) with blur(20px) and logo mark spins 1080deg.

Accent Bars

Module cards show a 3px top gradient bar on hover; solution cards show a 3px left gradient bar. Both use the Accent Bar gradient with opacity 0→1 transition.

Marquee

Infinite horizontal scroll at 40s duration, linear timing. White dot indicators (6px) with box-shadow glow. Track masked at edges with a fade gradient.

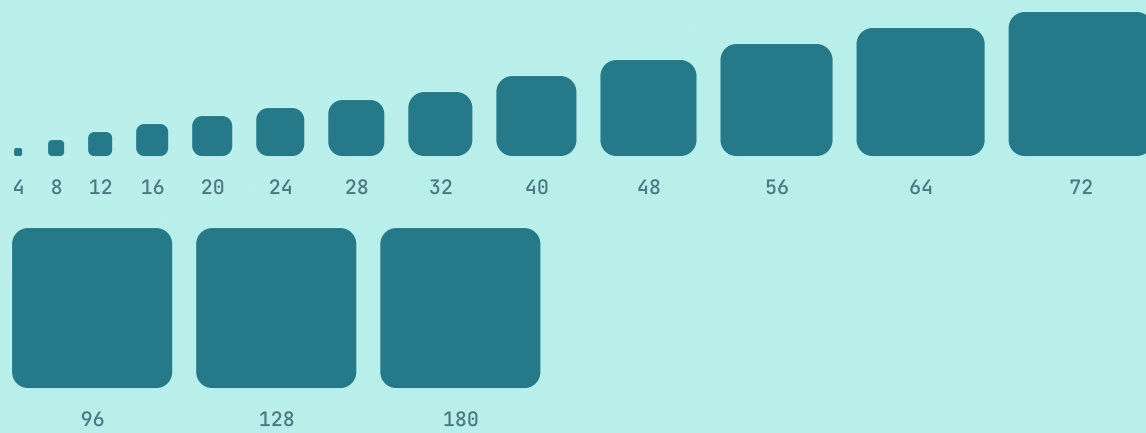

Tetrahedron

3D wireframe tetrahedron rendered to SVG. Follows cursor with inertia-damped rotation. Clicking locks it and reveals the brand wordmark. Wire color blends from white (front) to teal-tinted white (back: rgb 200,230,225).

SPACING & RADII

Spacing Scale

A 16-step scale from 4px micro-gaps to 180px section padding. Click to copy.

BORDER RADIUS

Design Principles

Glass Over Gradient

Every content surface floats on the teal gradient via white-alpha glassmorphism. Never use opaque backgrounds — the gradient must breathe through.

Navy on Glass

Text on glass surfaces uses #06293E (Navy) at full or reduced opacity. White text is reserved for content sitting directly on the gradient (hero, marquee, footer).

White Glow Effects

All ambient effects (cursor aura, plasma, pulses) use white radial gradients with mix-blend-mode: screen. This keeps them harmonious against any teal tone.

Subtle Interaction

Hover states are gentle: opacity lifts (0.55→0.62), border brightening, and 3px accent bar reveals. No aggressive transforms or scale changes.
