

BRAND GUIDELINES V4.0

Dark Depth Design System

The dark, immersive visual identity for Strategia. Ultra-transparent surfaces on a deep blue-to-teal gradient — premium, professional, and dramatic.

LOGO & BRAND MARK

Logo & Brand Mark

Three elements compose the Strategia identity system: the triangle brand mark, the wordmark, and the combined logo. Below are the variants used across the Dark Depth landing page.

BRAND MARK

The standalone brand mark. Used in the navigation bar where it animates on scroll.

WORDMARK

STRATEGIA

STRATEGIA

The wordmark without the brand mark. Used in the navigation bar alongside the triangle and in the hero brand lockup.

COMBINED LOGO — INLINE

The primary combined logo in horizontal layout.
COMBINED LOGO — STACKED

The stacked layout for vertical or compact placements.

GLOW TREATMENT

The glow variant with a soft luminous halo. Used in the CTA section and footer.

CLEAR SPACE & MINIMUM SIZE

Minimum clear space equals the height of the brand mark (triangle) on all sides.

Minimum reproduction width: 120px for inline, 80px for stacked.

COLORS

Color Palette

A dark, monochromatic base with a single teal accent (#5CC8B8). The accent does all the heavy lifting — it signals interactivity, highlights data, and provides the only chromatic relief.

PRIMARY

Black

 #1C1C1C

 R28 G28 B28

 --black

True dark. The deepest anchor of the primary gradient. Used at gradient origin and as the darkest tone.

Navy Black

 #00192E

 R0 G25 B46

 --navy-black

Dark navy. The dominant background tone for most of the page. Scrolled nav background, footer base.

SECONDARY

Dark Blue

 #003D6B

 R0 G61 B107

 --dark-blue

Rich midnight blue. Gradient midpoint, marquee band, and ambient radial glows.

Medium Blue

 #006988

 R0 G105 B136

 --medium-blue

Ocean blue. Transitional gradient stop between the dark core and teal highlight.

ACCENT

Teal

 #5CC8B8

 R92 G200 B184

 --accent

The single accent color. Stat values, eyebrow labels, badge checks, marquee dots, slider thumbs, solution links, and hover borders. The only chromatic break against the dark palette.

NEUTRAL

White

 #FFFFFF

 R255 G255 B255

 --primary

Primary text color. Headlines, card titles, and high-emphasis content.

SURFACE

Card

 rgba(255,255,255,0.04)

 White 4%

 --surface

Default card and section background. Barely visible — the content structure comes from borders and subtle opacity differences.

Card Elevated

 rgba(255,255,255,0.08)

 White 8%

 --elevated

Hover state for cards. Doubles the base opacity for a subtle lift effect.

Stat Surface

 rgba(255,255,255,0.05)

 White 5%

 --stat-surface

Slightly above the card base. Used for stat cards and science stats to create visual grouping.

CTA Surface

 rgba(255,255,255,0.06)

 White 6%

 --cta-surface

The call-to-action section. Paired with blur(20px) and a subtle 0.12 border.

GRADIENTS

Signature Gradients

Four gradients define the Dark Depth language. Click any preview to copy the CSS value.

 Click to copy CSS

Dark Depth Primary Brand Gradient

The signature 5-stop dark gradient. Transitions from pure dark through midnight blue to a teal highlight. Used as the page background, hero backdrop, and footer.

 #1C1C1C 

 #00192E 

 #003D6B 

 #006988 

 #5CC8B8 

 Click to copy CSS

Marquee Band Marquee / Banner Gradient

A 3-stop dark-blue gradient for the scrolling marquee strip. Intentionally excludes the teal endpoint to keep the band subdued.

 #00192E 

 #003D6B 

 #006988

Teal Accent Bar Interactive Accent

The teal-based directional bar revealed on hover. Module cards show it on the top edge (3px), solution cards on the left edge (3px).

 #5CC8B8 

 rgba(92,200,184,0.5) 

 rgba(92,200,184,0.2) 

Footer Fade Footer Background

A vertical fade to near-black for the footer section. Darkens progressively to ground the page.

TYPOGRAPHY

Typography

Three font families — Inter, Inter Tight, and JetBrains Mono — combined with a white opacity scale and teal accent to create a clear visual hierarchy. Each role is shown below at its actual rendering style.

SURFACES & DEPTH

Surface System

Content sections sit directly on the gradient with no enclosing panels — structure comes from ultra-subtle card backgrounds and thin borders. This creates an open, immersive feel.

Hiring Intelligence

Content floats directly on the gradient — no enclosing surface or visible panel.

Section Background

transparent

Sections have no enclosing panel — content sits directly on the gradient. Structure comes from card boundaries and thin borders.

Resume Intelligence

Extracts 140+ structured signals from unstructured resumes.

Card

rgba(255,255,255,0.04)

blur(16px)

rgba(255,255,255,0.10)

Module cards, solution cards, and badge grids. Hover lifts to rgba(255,255,255,0.08) with a teal border tint.

The V-FIT Method

Three signal types converge to predict candidate success with precision.

Inner Panel

rgba(255,255,255,0.04)

blur(16px)

rgba(255,255,255,0.10)

Triangulate section, enterprise section, and process section — larger enclosed areas that group related content.

EFFECTS & MOTION

Visual Effects

Ambient motion and interactive feedback tuned for the dark palette. Cursor and plasma effects use teal, creating colored light pools on the dark canvas.

Cursor Aura

A 520px radial teal glow (rgba 92,200,184 at 0.30→0) that follows the mouse. Uses mix-blend-mode: screen and filter: blur(10px). The teal tone creates colored light on the dark canvas.

Plasma Blobs

Floating teal radial gradient circles (same gradient as cursor aura) that drift across the page. The teal tint (rgba 92,200,184) creates colored light pools on the dark background.

Pulse Rings

Expanding concentric circles with a ring-shaped radial gradient. The white ring effect works on dark backgrounds via screen blend mode.

Scroll Reveal

Elements fade in from 24px below, opacity 0→1, cubic-bezier(0.16, 1, 0.3, 1), 0.7s duration. Triggered by IntersectionObserver.

Nav Appear

Fixed nav starts invisible. On scroll, gains dark glass background (rgba 0,25,46,0.65) with blur(20px). Logo mark stays white. Spins 1080deg on appear.

Teal Accent Bars

Module cards show a 3px top bar of teal gradient on hover; solution cards show a 3px left bar. Border color also shifts to rgba(92,200,184,0.3) — a teal tint rather than just brightening white.

Marquee

40s infinite scroll on a dark-blue gradient band. Dots are #5CC8B8 teal with box-shadow glow (rgba 92,200,184,0.4). Text at 0.85 white opacity.

Tetrahedron

3D wireframe tetrahedron rendered to SVG. Follows cursor with inertia-damped rotation. Clicking locks it and reveals the brand wordmark. Wire back-face color uses blue-tinted white (rgb 140,185,220) — cooler, more navy-aligned.

SPACING & RADII

Spacing Scale

PRINCIPLES

Design Principles

Open Canvas

No enclosing glass panels around content sections. The gradient is the canvas — cards float directly on it with ultra-subtle 0.04 backgrounds. The background gradient breathes through everything.

Single Accent

#5CC8B8 is the only chromatic color. It carries all interactive and emphatic meaning: stat values, links, checkmarks, eyebrows, slider thumbs, hover borders. This constraint creates a strong visual hierarchy.

Opacity as Hierarchy

Text hierarchy is built entirely from white opacity: 1.0 → 0.88 → 0.72 → 0.65 → 0.55 → 0.45 → 0.40. No secondary colors, no gray palette — just white at different opacities against dark backgrounds.

Teal-Colored Light

Ambient effects (cursor aura, plasma blobs) use teal instead of white. On the dark canvas, they create visible colored light pools rather than just luminance shifts. The interaction feel is immersive and dramatic.
